

# PWA

Andre Wolny

Batman & Robin

# The Case

Gotham City – Fights between 3 groups of workers – Riots starting

**Mobile  
Monkeys**

vs

**Web  
Winners**

vs

**Desktop  
Dynamite**

# The Case

## Gordon Calling Batman

# The Case

Batman calms down the situation  
But... Wait... Message from Riddler

?

Don't put the blame on me.  
Write once run everywhere is  
the key!

# The Case

## First Attempts

# The Case

Not really successfull

# The Case

New try – calling google – working together

# The Solution PWA - Characteristics

- Reliable (offline – no dinosaur)
- Performant / Fast
- Safe (HTTPS)
- Notifications
- Installable / Enganging
- Fresh (Up to date)

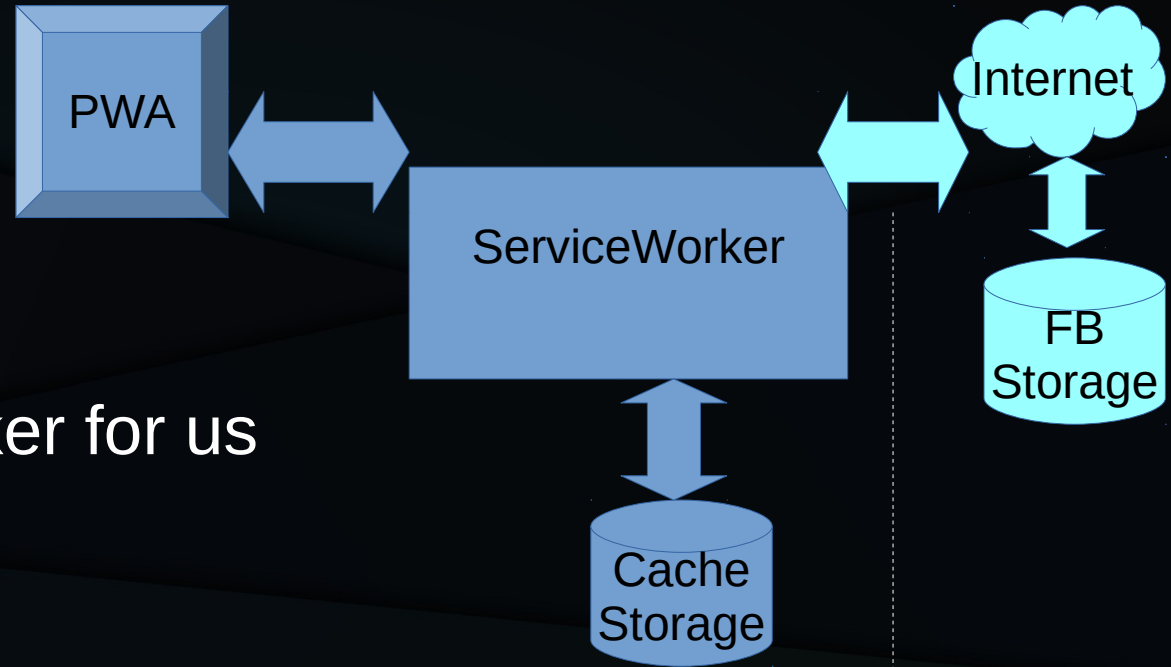

No need for a store

# The Solution PWA – HOW?

Service Workers  
“Proxy”- Decision Maker for us  
“Brain”

Local Device

# The Solution PWA – HOW?

## Manifest

→ tells browser how to handle web app

- Name
- Icons
- StartUrl

```
{  
  "name": "pwa-test",  
  "short_name": "pwa-test",  
  "theme_color": "#1976d2",  
  "background_color": "#fafafa",  
  "display": "standalone",  
  "scope": "/",  
  "start_url": "/",  
  "icons": [  
    {  
      "src": "assets/icons/icon-72x72.png",  
      "sizes": "72x72",  
      "type": "image/png"  
    },  
  ],  
}
```

# The Solution PWA – HOW?

OK Robin..we are using Angular  
Have a look

Time for the Bat Belt!

# The Solution PWA – HOW?

# Angular 5

Service Worker beta  
Lots of manual steps  
Breaking changes

# Angular 6

ng add @angular/pwa

→ Much more easy

## Smaller bundle sizes

## Angular Elements

# The Solution PWA – HOW?

## What is the *belt* doing?

- Updating package.json  
`"@angular/pwa": "^0.6.1"`
- Creating new Config File  
`ngsw-config.json`: Angular Service Worker package
- Creating manifest  
`./src/manifest.json`

# The Solution PWA – HOW?

What is the *belt* doing?

- Register Service Worker (Bootstrap)  
`src/app/app.module`

***ServiceWorkerModule.register('/ngsw-worker.js',  
{ enabled: environment.production })***

- Something more  
(assets/icons)

# The Solution PWA – HOW?

ServiceWorker-Configuration (*ngsw-config.json*)

**Groups for assets (img) and data**

**Cache**

maxAge: timelimit (1 hour)

maxSize: limit count (20)

timeout: 10s

**stragety**

*freshness*

(Only if the network times out -timeout-, does the request fall back to the cache)

*performance*

(If a resource exists in the cache, the cached version is used)

**Notifications** (Updates, Messages)

**Router aware** (groups of urls)

# The Solution PWA – HOW?

## Example

```
"dataGroups": [{  
  "name": "api-freshness",  
  "urls": [  
    "/new"  
  ],  
  "cacheConfig": {  
    "maxSize": 100,  
    "maxAge": "1h",  
    "timeout": "10s",  
    "strategy": "freshness"  
  }  
}, {  
  "name": "api-performance",  
  "urls": [  
    "/",  
    "/jobs", "/show"  
  ],  
  "cacheConfig": {  
    "maxSize": 100,  
    "maxAge": "1d",  
    "strategy": "performance"  
  }  
}]
```

# The Solution PWA – HOW?

## Additional Help

- Youtube (older stuff)  
Google io 17  
<https://www.youtube.com/watch?v=C8KcW1Nj3Mw>  
Angular and Service Workers  
<https://www.youtube.com/watch?v=8rmBA9Asbfw>
- Bring PWA into Stores  
MS is crawling  
<https://medium.freecodecamp.org/i-built-a-pwa-and-published-it-in-3-app-stores-here>
- Support Status  
<https://jakearchibald.github.io/isserviceworkerready/index.html#moar>
- PWA Builder  
<https://www.pwabuilder.com/>

# Peace in Gotham? Future

→ Every Angular App is a PWA

More support to come

Downside / still to improve:

- switch to dist
- own http server
- more configuration
- sometimes still feels unnatural

# Peace in Gotham? Live Demo

Creating standard Angular app  
and convert to PWA
